

A large, glowing Ethereum coin is the central focus, resting on a dark, ornate pedestal. The coin features the Ethereum logo and the words 'ETHEREUM' and 'DECENTRALIZED PLATFORM'. Overlaid on the coin is the word 'CryptoBase' in a large, white, serif font. The background is a dark, atmospheric setting with a stone wall, a small arched window with a fire inside, and a blue banner with a yellow diamond symbol on the left.

CryptoBase

The Secure, Agentic, Private DeFi Operations Platform

Non-custodial lending, trading, risk intelligence, and human-approved automation

Solomon Shasanmi: "Making DeFi not suck."

The DeFi Problem

- **\$4B+ lost** in 2025 hacks (smart contracts, bridges, opsec, governance)
- **Opaque risk:** Sudden liquidations, bad debt cascades (e.g., Aave incidents)
- **No usable APIs** for yield/opportunities
- **Manual everything** → Retail gets wrecked; no agentic flows
- **Missing:** On-chain insurance signals, reputation, & identity.
- Results in **Trillions in idle capital**, eroded trust, & slow adoption.
- **Lack of privacy:** positions fully public, exposing users to various attacks

What CryptoBase Does

We give you a full user base in one app

- **Wallet connect + SIWE**
- **Supply → Borrow → Manage** positions
- **Trade** (swaps)
- **Real-time risk scoring** + alerts
- **Rule + LLM agent suggestions** (human-approved)
- **Midnight Confidential Privacy Layer** – shielded positions with zero-knowledge-style attestations
- **Public APIs** for everything

Well... How?

- **Security:** Audited Foundry contracts + *Midnight confidential smart contracts*
- **Privacy:** On-chain commitments and public attestations – amounts stay hidden while risk metrics remain verifiable
- **Risk Management:** Health factor + classifications with shielded data
- **Agentic Flows:** Conservative suggestions + mandatory human approval
- **APIs & Extensibility:** Scoped API keys returning privacy-preserving data

Combines EVM transparency where needed with Midnight privacy where it matters.

Core Features Broken Down

- **Lending Pool** (supply/borrow/liquidate) with realistic parameters.
- **Dashboard** with positions, health factor, alerts.
- **Trading** quotes + execution.
- **Agent** preferences + suggestions (rules first, LLM optional).
- **Midnight Privacy Shield:** commitments, attestations, and public verification
- **Public API:** returning privacy-preserved positions and risk data

Target Market & Opportunity

Retail DeFi users tired of losses.

Developers/builders needing yield/risk APIs.

AI Agent creators for safe DeFi execution.

Privacy centered users & institutions

Institutions testing compliant flows.

This Market targets over \$100B in revenue

A large orange circle is positioned on the left side of the slide, partially cut off by the edge.

Business Model – How We (and Users) Win

- **Freemium** (core free).
- **Premium** LLM/agent tiers, advanced alerts.
- **API** subscriptions.
- **Privacy Shield** & other confidential features

**We're not looking to bleed our customers pockets,
we want sustainable & aligned incentives**

A series of blue dashed lines are located in the bottom right corner of the slide, forming a curved, upward-pointing shape.

Technical Overview

Backend: Flask app factory, SQLAlchemy models

Blockchain: web3.py + unsigned tx builder

Contracts: EVM (Foundry) + Midnight confidential contracts (private_lending.compact)

Frontend: HTMX + Privacy Shield panel showing “Shielded” metrics

Privacy Layer: midnight_service.py – SHA 256 commitments, attestation, & public risk proofs.

Midnight Synergy

Midnight brings programmable privacy + verifiable contracts. CryptoBase delivers:

- Shielded position amounts (commitments)
- Public attestations & risk class verification
- Privacy Shield dashboard panel
- Privacy-preserving API responses
- **Perfect alignment:** Secure EVM foundation today + confidential, compliant DeFi tomorrow.

Next Steps

Completing an extensive testing period in testnet E2E

Going open source & providing API documentation

Further developing the user/agent feedback loop

Expanding midnight privacy features

Scaling/ Partnerships/ Sponsorships

Let's ship the future of safe on-chain finance

Call to Action

CryptoBase isn't just another DeFi app.

It's the control tower DeFi has been missing.

Let's build it right—secure, intelligent, and most importantly private.

Let's make it real.
